HISTORIC SITE FORM - HISTORIC SITES INVENTORY
PARK CITY MUNICIPAL CORPORATION (10-08)

1 IDENTIFICATION

Name of Property:
Address: 1062 Woodside Avenue
AKA:
City, County: Park City, Summit County, Utah
Tax Number: SA-39
Current Owner Name: Heidi & Christopher Johnson
Current Owner Address: 2 Crows Nest Road, Bronxville, New York, 10708
Legal Description (include acreage): LOT 20, BLK 4 SNYDERS ADDITION TO PARK CITY; 0.04 ACRES.

4 ARCHITECTURAL DESCRIPTION & INTEGRITY

Building Type and/or Style: Other residential type
No. Stories: 1
Additions: ☐ none ☐ minor ☑ major (describe below) Alterations: ☐ none ☑ minor ☐ major (describe below)
Number of associated outbuildings and/or structures: ☑ accessory building(s), # _____; ☑ structure(s), # _____.
General Condition of Exterior Materials:
☑ Good (Well maintained with no serious problems apparent.)

Researcher/Organization: Preservation Solutions/Park City Municipal Corporation Date: 12-2008
Material(s) (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):

Site: House set back from street.
Foundation: Not able to verify.
Walls: Wood siding, narrow shiplap and wider shiplap.
Roof: Asphalt shingle.
Windows/Doors: Casement type, paired and in ribbon.

Essential Historical Form: ☑ Retains  ☐ Does Not Retain, due to:

Location: ☑ Original Location  ☐ Moved (date __________) Original Location:

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates—known or estimated—when alterations were made): The one-story frame house has been altered significantly. This frame structure suggests either a narrow gable-front house or a square pyramid house with extensive alterations to the main façade and roof form. Additions appear to have been constructed on the street façade that include low-pitched gable front projecting bay and either an enclosed porch or new extended enclosure to the north. Two small shed dormers are placed symmetrically on the roof above the entryway. According to the Building Department, the house was repaired in 1981 after a fire and the front porch was constructed in 1999.

Setting (The physical environment—natural or manmade—of a historic site. Describe the setting and how it has changed over time.): The setting is typical of Park City's older homes, including a small front yard and low fence. The majority of the front yard, however, is paved to accommodate a parking area.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.): It appears that much of the physical evidence from the period that defines the typical Park City mining era home has been altered and, therefore, lost.

Feeling (Describe the property's historic character.): Aside from general form, the physical elements of the site, in combination, do not effectively convey a sense of life in a western mining town of the late nineteenth and early twentieth centuries.

Association (Describe the link between the important historic era or person and the property.): The only direct link between the mining era and this house is the reference in the Summit County Recorder's office that this house was built c. 1910.

Without sufficient physical information, the site is not eligible for the National Register of Historic Places.

5 SIGNIFICANCE

Architect: ☑ Not Known  ☐ Known:  (source: )  Date of Construction: c. 1910

Builder: ☑ Not Known  ☐ Known:  (source: )

The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1 Summit County Recorder.
1. Historic Era:
   - Settlement & Mining Boom Era (1868-1893)
   - Mature Mining Era (1894-1930)
   - Mining Decline & Emergence of Recreation Industry (1931-1962)

   Park City was the center of one of the top three metal mining districts in the state during Utah's mining boom period of the late nineteenth and early twentieth centuries, and it is one of only two major metal mining communities that have survived to the present. Park City's houses are the largest and best-preserved group of residential buildings in a metal mining town in Utah. As such, they provide the most complete documentation of the residential character of mining towns of that period, including their settlement patterns, building materials, construction techniques, and socio-economic make-up. The residences also represent the state's largest collection of nineteenth and early twentieth century frame houses. They contribute to our understanding of a significant aspect of Park City's economic growth and architectural development as a mining community.²

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):
