### 4 ARCHITECTURAL DESCRIPTION & INTEGRITY

**Building Type and/or Style:** T/L cottage / Vernacular style  
**No. Stories:** 1  
**Additions:** ☐ none ☐ minor ☑ major (describe below)  
**Alterations:** ☐ none ☑ minor ☐ major (describe below)

**Researcher/Organization:** Dina Blaes/Park City Municipal Corporation  
**Date:** November, 08
Number of associated outbuildings and/or structures: □ accessory building(s), # _____; □ structure(s), # _____.

General Condition of Exterior Materials:
- ☑ Good (Well maintained with no serious problems apparent.)
- ☐ Fair (Some problems are apparent. Describe the problems.):
- ☐ Poor (Major problems are apparent and constitute an imminent threat. Describe the problems.):
- ☐ Uninhabitable/Ruin

Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):
- Foundation: Tax cards indicate no foundation, not verified.
- Walls: Drop siding.
- Roof: Cross-wing roof form sheathed in metal material.
- Windows/Doors: Double-hung sash type and decorative fixed casement diamond type.

Essential Historical Form: ☑ Retains  ☐ Does Not Retain, due to:

Location: ☑ Original Location  ☐ Moved (date __________) Original Location:

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates—known or estimated—when alterations were made): The one-story frame T/L cottage remains unchanged from the description provided in the National Register nomination form (see Structure/Site Form, 1983).

Setting (The physical environment—natural or manmade—of a historic site. Describe the setting and how it has changed over time.): The setting is unchanged from early tax photos and Sanborn maps. The house sits on approximately 0.09 acres.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.): The physical evidence from the period that defines this as a typical Park City mining era house are the simple methods of construction, the use of non-beveled (drop-novelty) wood siding, the plan type, the simple roof form, the informal landscaping, the restrained ornamentation, and the plain finishes.

Feeling (Describe the property's historic character.): The physical elements of the site, in combination, convey a sense of life in a western mining town of the late nineteenth and early twentieth centuries.

Association (Describe the link between the important historic era or person and the property.): The "T" or "L" cottage (also known as a "cross-wing") is one of the earliest and one of the three most common house types built in Park City during the mining era.

This site was nominated to the National Register of Historic Places in 1984 as part of the Park City Mining Boom Era Residences Thematic District, but was not listed because of the owner's objection. It was built within the historic period, defined as 1872 to 1929 in the district nomination. The site retains its historic integrity and would be considered eligible for the National Register as part of an updated or amended nomination. As a result, it meets the criteria set forth in LMC Chapter 15-11 for designation as a Landmark Site.

5 SIGNIFICANCE

Architect: ☑ Not Known  ☐ Known: (source: )  Date of Construction: c. 1884¹

Builder: ☑ Not Known  ☐ Known: (source: )

The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

¹ Summit County Tax Assessor; appears in the 1907 Sanborn Insurance map.
1. Historic Era:
   - Settlement & Mining Boom Era (1868-1893)
   - Mature Mining Era (1894-1930)
   - Mining Decline & Emergence of Recreation Industry (1931-1962)

   Park City was the center of one of the top three metal mining districts in the state during Utah's mining boom period of the late nineteenth and early twentieth centuries, and it is one of only two major metal mining communities that have survived to the present. Park City's houses are the largest and best-preserved group of residential buildings in a metal mining town in Utah. As such, they provide the most complete documentation of the residential character of mining towns of that period, including their settlement patterns, building materials, construction techniques, and socioeconomic make-up. The residences also represent the state's largest collection of nineteenth and early twentieth century frame houses. They contribute to our understanding of a significant aspect of Park City's economic growth and architectural development as a mining community.²

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):

Researcher: Roger Roger  
Date: 4/84
Architect/Builder: Unknown
Building Materials: Wood
Building Type/Style: T/L Cottage

Description of physical appearance & significant architectural features:
(Include additions, alterations, ancillary structures, and landscaping if applicable)

This house is a one story frame T/L cottage with a gable roof. A porch spans the west side of the stem-wing, and is supported on lathe turned piers. Jigsaw cut decorative brackets top the piers. A 1977 photograph of this house shows that the original porch was enclosed at that time. Between 1977 and 1983 the enclosed porch was removed and replaced by the present porch. The piers and brackets therefore are not original, but are the types of porch elements that were commonly used at the time this house was built. There are two windows on the gable end of the cross-wing, and a window and door on the stem-wing. The windows are the double hung sash type with one over one lights. There is a diamond-shaped window in the north wall of the cross-wing. A shed extension was added to the rear of the house, as is indicated by the break in the siding of the north wall, and by the overlapping of the two roofs. The extension complements the house in scale and materials. In-period extensions are part of Park City's architectural vocabulary. Although in many cases an extension represents a major alteration of the original house, it usually contributes to the significance of a house because it documents the most common and acceptable method of expansion of the small Park City house. With the removal of the enclosed porch and its replacement with a complementary porch, the house was restored to its original form.

Statement of Historical Significance:
Built c. 1895, the Mrs. J.S. Lindsay House at 51 Prospect is architecturally significant as one of 78 extant T/L cottages in Park City, 17 of which are included in this nomination. The T/L cottage is one of the three most common house types built during the early period of Park City's mining boom era, and significantly contributes to the character of the residential area.

This house was built between 1889 and 1900, as indicated by the Sanborn Insurance Maps, but the exact date of its construction and the name of its original owner are unknown. A 1904 transaction involving the adjacent property at 57 Prospect described that property as being south of the house owned by Mrs. J.S. Lindsay,¹ which would be this house at 51 Prospect. The ownership records for this property are incomplete and somewhat vague, so it is not surprising that they do not show Mrs. Lindsay as an owner of legal record. The fact that she was identified as the owner in the 1904 transaction, however, lends substantial support to the assumption that she was indeed the owner of this house for a time. The only clue to uncovering the identity of Mrs. J.S. Lindsay is that given in the 1910 census records, which list a John and Ester Lindsay as residents of a house on Ontario Ridge (a name often given to this area on Prospect). The Lindsays are listed as renters rather than owners of their house, however, so it is uncertain whether or not they were the owners of this house in 1904. The first person positively identified as an owner of this house is William D. Wright, who is first listed in 1921 when he was selling the property to Niles E. and Madora Wilson Moline. It is unknown how long Wright owned the property, and nothing is known about Wright himself.

T.H. Paull, who bought the house in 1930 from the Molines, was the only other owner of this house during the historic period.
