4 ARCHITECTURAL DESCRIPTION & INTEGRITY

Building Type and/or Style: Other residential type / Vernacular style
No. Stories: 1

Additions: ☐ none  ☑ minor  ☐ major (describe below) Alterations: ☐ none  ☑ minor  ☐ major (describe below)

Number of associated outbuildings and/or structures: ☐ accessory building(s), # _____; ☐ structure(s), # _____.

General Condition of Exterior Materials:

☑ Good (Well maintained with no serious problems apparent.)
☐ Fair (Some problems are apparent. Describe the problems.): 
☐ Poor (Major problems are apparent and constitute an imminent threat. Describe the problems.): 
☐ Uninhabitable/Ruin

Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):

Foundation: Tax cards for 1949 and 1958 note that there is no foundation. By 1968 a concrete foundation is mentioned. The foundation is not visible in the available photographs and therefore its material or existence cannot be verified.

Walls: The exterior walls are clad in wooden drop/novelty siding.

Roof: The roof materials or shape cannot be verified from the available photographs.

Windows/Doors: The two façade windows visible in the 2006 photograph are single-pane double-hung in a single opening with a simple wooden surround. The entry door cannot be clearly seen in the 2006 photograph.

Essential Historical Form: ☑ Retains ☐ Does Not Retain, due to:

Location: ☑ Original Location  ☐ Moved (date __________) Original Location:

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates--known or estimated--when alterations were made): Documented additions to this frame other residential type house include a ten foot by ten foot addition to the side constructed between 1958 and 1968. Available photographs do not show enough of the house to reveal any alterations.

Setting (The physical environment--natural or manmade--of a historic site. Describe the setting and how it has changed over time.):
Available photographs do not show enough of the site to reveal the setting.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.): The distinctive elements that define this as a typical Park City mining era house are the simple methods of construction, the use of non-beveled (drop-novelty) wood siding, the simple roof form, the restrained ornamentation, and the plain finishes.

Feeling (Describe the property's historic character.): Available photographs do not show enough of the site to reveal the feeling.

Association (Describe the link between the important historic era or person and the property.): The other residential type was a house type built in Park City during the mining era.

5 SIGNIFICANCE

Architect: ☑ Not Known  ☐ Known: (source: )
Date of Construction: c. 1904¹

¹ Summit County Recorder.
The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1. Historic Era:
   - Settlement & Mining Boom Era (1868-1893)
   - Mature Mining Era (1894-1930)
   - Mining Decline & Emergence of Recreation Industry (1931-1962)

   Park City was the center of one of the top three metal mining districts in the state during Utah’s mining boom period of the late nineteenth and early twentieth centuries, and it is one of only two major metal mining communities that have survived to the present. Park City’s houses are the largest and best-preserved group of residential buildings in a metal mining town in Utah. As such, they provide the most complete documentation of the residential character of mining towns of that period, including their settlement patterns, building materials, construction techniques, and socio-economic make-up. The residences also represent the state’s largest collection of nineteenth and early twentieth century frame houses. They contribute to our understanding of a significant aspect of Park City’s economic growth and architectural development as a mining community.²

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):

6 PHOTOS

Digital color photographs are on file with the Planning Department, Park City Municipal Corp.
