HISTORIC SITE FORM - HISTORIC SITES INVENTORY
PARK CITY MUNICIPAL CORPORATION (10-08)

1 IDENTIFICATION

Name of Property:
Address: 827 Norfolk Avenue

City, County: Park City, Summit County, Utah

Current Owner Name: Robert J. Martino

Current Owner Address: PO Box 2080, Park City, UY 84060-2080

Legal Description (include acreage): Lot 1 Mustang Subdivision, cont 2891.8 sq ft or 0.06 acres.

4 ARCHITECTURAL DESCRIPTION & INTEGRITY

Building Type and/or Style: Other Residential Type / Vernacular style

No. Stories: 3

Additions: ☑ none ☐ minor ☑ major (describe below)

Alterations: ☑ none ☐ minor ☑ major (describe below)

Number of associated outbuildings and/or structures: ☑ accessory building(s), # _____; ☑ structure(s), # _____

General Condition of Exterior Materials:

Researcher/Organization: Preservation Solutions/Park City Municipal Corporation Date: 12-2008
Good (Well maintained with no serious problems apparent.)

☐ Fair (Some problems are apparent. Describe the problems.):

☐ Poor (Major problems are apparent and constitute an imminent threat. Describe the problems.):

☐ Uninhabitable/Ruin

Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):

Foundation: With the major construction in 2008 the foundation is concrete.

Walls: All wall cladding appears to be new in 2008. The first floor is clad in wooden board and batten siding, the second and third floors in wooden drop or novelty siding.

Roof: The complex roof form is clad in composite shingles.

Windows/Doors: All presumably date from the construction in 2008. The window materials cannot be determined from the photographs.

Essential Historical Form: ☑ Retains  ☐ Does Not Retain, due to:

Location: ☐ Original Location  ☑ Moved (date ___2007-08____) Original Location: Within the site.

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates--known or estimated--when alterations were made): The initial house was a hall-parlor type built within the historic period. Additions and alterations to the site in 2008 added two more stories and a complex roof line to the previous simple form.

Setting (The physical environment--natural or manmade--of a historic site. Describe the setting and how it has changed over time.): Like most of the historic neighborhoods in Park City, the overall setting is a compact streetscape with narrow side yards and other homes of smaller scale within close proximity.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.): The physical evidence from the period that defines the typical Park City mining era home--simple methods of construction, the use of non-beveled (drop-novelty) wood siding, plan type, simple roof form, informal landscaping, restrained ornamentation, and plain finishes--have been altered and, therefore, lost.

Feeling (Describe the property's historic character.): The physical elements of the site, in combination, do not effectively convey a sense of life in a western mining town of the late nineteenth and early twentieth centuries.

Association (Describe the link between the important historic era or person and the property.): The extent of the alterations and additions to the main building diminishes its association with the past; however, the extent of the alterations to the main building diminishes its association with the past.

The extent and cumulative effect of alterations to the site render it ineligible for listing in the National Register of Historic Places.

5 SIGNIFICANCE

Architect: ☑ Not Known  ☐ Known: (source: )  Date of Construction: c. 1900

Builder: ☑ Not Known  ☐ Known: (source: )

The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1. Historic Era:
   ☐ Settlement & Mining Boom Era (1868-1893)
   ☑ Mature Mining Era (1894-1930)
□ Mining Decline & Emergence of Recreation Industry (1931-1962)

Park City was the center of one of the top three metal mining districts in the state during Utah's mining boom period of the late nineteenth and early twentieth centuries, and it is one of only two major metal mining communities that have survived to the present. Park City's houses are the largest and best-preserved group of residential buildings in a metal mining town in Utah. As such, they provide the most complete documentation of the residential character of mining towns of that period, including their settlement patterns, building materials, construction techniques, and socio-economic make-up. The residences also represent the state's largest collection of nineteenth and early twentieth century frame houses. They contribute to our understanding of a significant aspect of Park City's economic growth and architectural development as a mining community.¹

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):
