4 ARCHITECTURAL DESCRIPTION & INTEGRITY

Building Type and/or Style: Pyramid house variant
No. Stories: 1 ½

Additions: ☒ none ☐ minor ☒ major (describe below)
Alterations: ☐ none ☒ minor ☒ major (describe below)

Researcher/Organization: Preservation Solutions/Park City Municipal Corporation
Date: 12-2008
Number of associated outbuildings and/or structures: ☐ accessory building(s), # ____; ☑ structure(s), # _1___.

General Condition of Exterior Materials:

☑ Good (Well maintained with no serious problems apparent.)
☐ Fair (Some problems are apparent. Describe the problems.)
☐ Poor (Major problems are apparent and constitute an imminent threat. Describe the problems.)
☐ Uninhabitable/Ruin

Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):

Site: Stone retaining wall runs the length of frontage.
Walls: Drop siding.
Roof: Truncated hip with truncated gable - standing seam metal.
Windows/Doors: Paired double-hung with decorative glazing in the upper sash, a multi-pane fixed casement with a decorative fixed transom, paired double-hung sash, and single double-hung sash type windows. Entry door is frame-and-panel with upper rectangular light and a stained glass transom.

Essential Historical Form: ☑ Retains ☐ Does Not Retain, due to:

Location: ☑ Original Location ☐ Moved (date __________) Original Location:

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates--known or estimated--when alterations were made): The house remains as it was described in the original National Register nomination form prepared in 1983 (see form for description). No major alterations have been made and the house retains its original character.

Setting (The physical environment--natural or manmade--of a historic site. Describe the setting and how it has changed over time.): The setting remains unchanged. A stone retaining wall runs along the street front and is interrupted only by the entry steps.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.): The physical evidence from the period that defines this as a typical Park City mining era house are the simple methods of construction, the use of non-beveled (drop-novelty) wood siding, the plan type, the roof form, the informal landscaping, the restrained ornamentation, and the plain finishes.

Feeling (Describe the property's historic character.): The physical elements of the site, in combination, convey a sense of life in a western mining town of the late nineteenth and early twentieth centuries.

Association (Describe the link between the important historic era or person and the property.): The Pyramid house is one of the three most common house types built in Park City during the mining era.

This site was listed on the National Register of Historic Places in 1984 as part of the Park City Mining Boom Era Residences Thematic District. It was built within the historic period, defined as 1872 to 1929 in the district nomination, and retains its historic integrity. As a result, it meets the criteria set forth in LMC Chapter 15-11 for designation as a Landmark Site.

5 SIGNIFICANCE

Architect: ☐ Not Known ☑ Known: (source: ) Date of Construction: c. 1898^1

^1 Summit County Recorder.
The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1. Historic Era:
   - Settlement & Mining Boom Era (1868-1893)
   - Mature Mining Era (1894-1930)
   - Mining Decline & Emergence of Recreation Industry (1931-1962)

   Park City was the center of one of the top three metal mining districts in the state during Utah's mining boom period of the late nineteenth and early twentieth centuries, and it is one of only two major metal mining communities that have survived to the present. Park City's houses are the largest and best-preserved group of residential buildings in a metal mining town in Utah. As such, they provide the most complete documentation of the residential character of mining towns of that period, including their settlement patterns, building materials, construction techniques, and socio-economic make-up. The residences also represent the state's largest collection of nineteenth and early twentieth century frame houses. They contribute to our understanding of a significant aspect of Park City's economic growth and architectural development as a mining community.²

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):

Architects File, Utah State Historical Society
Park Record. April 27, 1895, p. 3.
Architect/Builder: C. H. Campbell

Building Materials: Wood

Building Type/Style: Pyramid House (variant)

Description of physical appearance & significant architectural features:
(Including additions, alterations, ancillary structures, and landscaping if applicable)

This house is a one and one half story variant of the pyramid house. Features of this example of the variant that are typical of the basic pyramid house are the generally symmetrical facade with a door set slightly off-center between two windows, and the low pitch hip roof porch spanning the facade. Key characteristics of the variant include a long rectangular form built deep on the lot, and a truncated hip or gable roof with a clipped gable on the facade. This house is the most elaborate example of this type of variant. What distinguishes this house from other examples of both the basic pyramid house and variants of the type is the emphasis on decorative features, standard Victorian decorative elements, which create visual variety in texture and pattern. The basic form, which is almost identical to the more austere example of the type at 539 Park, is embellished with fishscale shingles in the gable section, a gable that projects from the clipped roof section over the paired windows in the gable section, the decorative pediment with a tiny sunburst element on it that is attached to the porch over the entrance bay, the pent corners on the facade, into which windows have been set, that are decorated with lacy brackets which intersect at a spool, and the decorative elements of the porch. The lathed turned piers, spindle band and decorative brackets are typical of late Victorian design, but few distinctive examples of

(See continuation sheet)

Statement of Historical Significance:

Built in 1895, the John C. Weeter House at 843 Norfolk is architecturally significant as one of 69 extant pyramid houses in Park City, 28 of which are included in this nomination. Of the 28 being nominated, eleven are true pyramid houses and seventeen are variants of the basic type. This house is one of the variants of the pyramid house. The pyramid house is one of the three most common house types built during the early period of Park City's mining boom era, and significantly contributes to the character of the residential area. It appeared early on, but survived with variations longer than the other two types.

John C. and Harriet Weeter bought this property in April of 1895 and mortgaged it for $450, indicating that they were financing the construction of a house. Two weeks later, it was noted in the Park Record that "C. H. Campbell has completed plans and specifications for an elegant new residence for J. C. Weeter.... Work on same will be commenced next week." Campbell, an architect/builder, was later involved in the construction of buildings in Eureka, another Utah mining town. In addition to serving as Weeter's home, this house may have been intended as a showplace for the lumber products offered by the Weeter Lumber Company, which John owned and operated.

John C. Weeter was born in Pennsylvania in 1858 and came to Salt Lake City in 1888, where he first engaged in the real estate business. He was one of hundreds of men who were drawn to the territory by the business opportunities generated by the booming mining industry. Soon after his marriage to Harriet Towne of Massachusetts in 1892, the couple moved to Park City, where John established the Weeter Lumber Company. He later established lumber yards in other Utah locations and in Pocatello, Idaho. His lumber business in Park City became the Summit Lumber Company in the early 1900s.

(See continuation sheet)
843 Norfolk
Description continued:

This type of ornamentation are extant in Park City. The original balusters were probably replaced, but the bannisters are intact. The two windows and door on the facade have decorative stained glass banding in the transoms. One window has a broad single pane and a transom. The single pane was replaced by a multi-pane window, a change that is minor and easily reversed. The other window consists of a pair of double hung sash one over one windows. A wavy trim that may not be original was attached beneath the windows on the facade, but it, too, does not affect the building's original integrity. There is another broad single pane and transom window on the north side of the building, as well as a door and a two over two double hung sash window. In addition to the minor alterations of the porch and windows, two extensions were added to the rear of the house. Both were built to complement the existing building, and do not affect its original character. In-period rear extensions are part of Park City's architectural vocabulary. Although in many cases an extension represents a major alteration of the original house, it usually contributes to the significance of the house because it documents the most common and acceptable method of expansion of the small Park City house. The building is in excellent condition and maintains its original character.

History continued:

In 1899 the Weeters sold this house to William S. Wright, who owned it for only about three years. Other owners include James C. Martin (1902-04), Willis A. Adams (1904-08) and Francis and Hulda Andrew (1908-39).

National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in How to Complete the National Register of Historic Places Registration Form (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name __ Weeter, John C., House

other name/site number ________________________________

2. Location

street name __ 843 Norfolk

city or town __ Park City

state __ Utah ___ code ___ UT ___ county __ Summit __ code ___ 043 ___ zip code ___ 84068 ___

National Register of Historic Places
Continuation Sheet

Section No. 7  Page 1  John C. Weeter, House, Park City, Summit County, UT

Narrative Description

The John C. Weeter House, at 843 Norfolk in Park City, Summit County, Utah, was previously found eligible for listing in the National Register of Historic Places (July 12, 1984) under the Residences of Mining Boom Era Park City thematic resource nomination, but due to owner objection was never officially listed. The current owner of the property wishes to have the owner objection removed and the building listed in the NRHP. The Utah Cultural Sites Review Committee reviewed the building on November 14, 2003, and agreed that the building retains its architectural integrity and is still eligible for listing on the NRHP.
8. Description

Applicable National Register Criteria
(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

☐ A Property is associated with events that have made a significant contribution to the broad patterns of our history.

☐ B Property is associated with the lives of persons significant in our past.

☒ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

☐ D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations
(Mark "x" in all the boxes that apply.)

Property is:

☐ A owned by a religious institution or used for religious purposes.

☐ B removed from its original location.

☐ C a birthplace or grave.

☐ D a cemetery.

☐ E a reconstructed building, object, or structure.

☐ F a commemorative property.

☐ G less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance
(Enter categories from instructions)

ARCHITECTURE

Period of Significance
1895-1953

Significant Dates
1895

Significant Persons
(Complete if Criterion B is marked above)

N/A

Cultural Affiliation
N/A

Architect/Builder
C.H. Campbell (architect/builder)

Narrative Statement of Significance
(Explain the significance of the property on one or more continuation sheets.)

☐ See continuation sheet(s) for Section No. 8

9. Major Bibliographical References

Bibliography
(Cite the books, articles, and other sources used in preparing this form on one or more continuation sheets.)

Previous documentation on file (NPS):

☐ preliminary determination of individual listing (36 CFR 67) has been requested

☐ previously listed in the National Register

☐ previously determined eligible by the National Register

☐ designated a National Historic Landmark

☐ recorded by Historic American Buildings Survey

☐ recorded by Historic American Engineering Record

Primary location of additional data:

☒ State Historic Preservation Office

☐ Other State agency

☐ Federal agency

☐ Local government

☐ University

☐ Other Name of repository:

☐ See continuation sheet(s) for Section No. 9
10. Geographical Data

Acreage of Property Less than one acre(s)
