Building Type and/or Style: Other late 20th c. type / Neo-Colonial Revival style

Additions: ☑ none ☐ minor ☑ major (describe below) Alterations: ☑ none ☐ minor ☑ major (describe below)

Number of associated outbuildings and/or structures: ☑ accessory building(s), # _____; ☑ structure(s), # _____.
General Condition of Exterior Materials:

- Good (Well maintained with no serious problems apparent.)
- Fair (Some problems are apparent. Describe the problems.): 
- Poor (Major problems are apparent and constitute an imminent threat. Describe the problems.): 
- Uninhabitable/Ruin

Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):

- Foundation: The foundation as visible in the 2006 photographs of the construction appears to be concrete.
- Walls: The exterior walls are clad with clapboard siding.
- Roof: The roof is sheathed in composition shingles.
- Windows/Doors: The windows appear to be fixed multi-pane windows. The door is wooden with two panels.

Essential Historical Form: ☑ Retains  ☐ Does Not Retain, due to:

Location: ☐ Original Location  ☑ Moved (date __2006-08___) Original Location: North on same street; previously situated on large lot that was subdivided. House moved south.

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates--known or estimated--when alterations were made): The initial World War II-era cottage in the Minimal traditional style was lifted a full story and set in front of and on top of a new house and garage. Faux Colonial Revival touches such as the flared lintels and fluted pilasters flanking the door give a false sense of history.

Setting (The physical environment--natural or manmade--of a historic site. Describe the setting and how it has changed over time.): Like most of the historic neighborhoods in Park City, the overall setting is a compact streetscape with narrow side yards and other homes of similar scale within close proximity.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.): The physical evidence from the period that defines the typical WWII-ear cottage have been altered and, therefore, lost.

Feeling (Describe the property's historic character.): The physical elements of the site, in combination, do not effectively convey a sense of life in a western mining town of the mid-twentieth century.

Association (Describe the link between the important historic era or person and the property.): The WWII-era Cottage type was a house type built in Park City during the Mining Decline & Emergence of Recreation Industry era; however, the extent of the alterations to the main building diminishes its association with the past.

The extent and cumulative effect of alterations to the site render it ineligible for listing in the National Register of Historic Places.

5 SIGNIFICANCE

Architect: ☑ Not Known  ☐ Known: (source: )  Date of Construction: c. 1942¹

Builder: ☑ Not Known  ☐ Known: (source: )

¹ Summit County Recorder.
The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1. Historic Era:
   - Settlement & Mining Boom Era (1868-1893)
   - Mature Mining Era (1894-1930)
   - Mining Decline & Emergence of Recreation Industry (1931-1962)

   Park City was the center of one of the top three metal mining districts in the state during Utah's mining boom period of the late nineteenth and early twentieth centuries. However, by the mid-twentieth century, most mines in Park City had closed, the population had dwindled, and building activity nearly ceased. Though the few houses built during this period generally reflect the types and styles used in communities throughout Utah, they were constructed in a way that reinforces the settlement patterns of Park City's significant mining era. They are both modest in scale and tightly packed on the hillsides, contributing to the overall character of the community.

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):
