HISTORIC SITE FORM - HISTORIC SITES INVENTORY
PARK CITY MUNICIPAL CORPORATION (10-08)

1 IDENTIFICATION

Name of Property:
Address: 901 Empire Avenue

City, County: Park City, Summit County, Utah

Current Owner Name: Mary Lou Toly Trustee

Current Owner Address: PO BOX 489, Park City, Utah 84060

Legal Description (include acreage): THAT PORTION OF LOTS 1 & 2, BLK 29, SNYDERS ADDITION TO PARK CITY LYING S'LY OF THE N'LY LINE OF THE CRESCENT TRAMWAY; 0.08 acres.

4 ARCHITECTURAL DESCRIPTION & INTEGRITY

Building Type and/or Style: Other residential style - combination of several types
No. Stories: 2

Additions: ☐ none ☐ minor ☑ major (describe below) Alterations: ☐ none ☐ minor ☑ major (describe below)

Number of associated outbuildings and/or structures: ☐ accessory building(s), # _____; ☐ structure(s), # _____.

General Condition of Exterior Materials:

Researcher/Organization: Preservation Solutions/Park City Municipal Corporation Date: 12-2008
Good (Well maintained with no serious problems apparent.)

☐ Fair (Some problems are apparent. Describe the problems.):

☐ Poor (Major problems are apparent and constitute an imminent threat. Describe the problems.):

☐ Uninhabitable/Ruin

Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):

- Foundation: Concrete or concrete block
- Walls: Aluminum siding.
- Roof: Hipped roof sheathed in asphalt shingles.
- Windows/Doors: Aluminum frame casement and aluminum side slider type.

Essential Historical Form: ☑ Retains  ☐ Does Not Retain, due to:

Location: ☑ Original Location  ☐ Moved (date __________) Original Location:

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates--known or estimated--when alterations were made):

The 2-story concrete and frame house has been significantly altered over time. The 1907 Sanborn Insurance map indicates a one-story frame structure set back off the roadway (Empire Avenue) with a narrow side porch on the south side of the house and a small and shallow porch on the northeast corner. The basic footprint appears to be the same as is seen in the Sanborn map. In addition, the tax photo shows a ½ basement level that appears to have been expanded by lifting the house between c. 1935 (tax photo) and 1995, in part, it seems to accommodate a basement garage. The side porches remain and are now supported by open metalwork supports and handrails. The small porch on the northeast corner has been expanded and includes an exterior stair that runs diagonally across the primary façade. The windows on the primary façade (based on the tax photo) were originally single and paired double-hung sash type windows that have been replaced by one large aluminum frame fixed casement window and small aluminum frame side slider types. The changes are significant and diminish the site's original character.

Setting (The physical environment--natural or manmade--of a historic site. Describe the setting and how it has changed over time.):

The setting has been altered by the introduction of the driveway to basement garage, but the overall grade of the site appears to remain as it was in the tax photo.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.):

Much of the physical evidence from the period that defines the typical Park City mining era home has been altered and, therefore, lost.

Feeling (Describe the property's historic character.):

The physical elements of the site, in combination, do not effectively convey a sense of life in a western mining town of the late nineteenth and early twentieth centuries.

Association (Describe the link between the important historic era or person and the property.):

The large rectangular hipped roof house (which may have originally been built as a modified pyramid house) was not an uncommon house type in Park City during the mining era; however the extent of the changes to the main building diminish its association with the past.

The extent and cumulative effect of alterations to the site render it ineligible for listing in the National Register of Historic Places.

5 SIGNIFICANCE

Architect: ☐ Not Known  ☑ Known:  (source: )

Date of Construction: c. 1905¹

¹ Structure appears on the 1907 Sanborn Insurance map; the Summit County Recorder indicates 1910 as the date of construction.
The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1. Historic Era:
   - Settlement & Mining Boom Era (1868-1893)
   - Mature Mining Era (1894-1930)
   - Mining Decline & Emergence of Recreation Industry (1931-1962)

   Park City was the center of one of the top three metal mining districts in the state during Utah's mining boom period of the late nineteenth and early twentieth centuries, and it is one of only two major metal mining communities that have survived to the present. Park City's houses are the largest and best-preserved group of residential buildings in a metal mining town in Utah. As such, they provide the most complete documentation of the residential character of mining towns of that period, including their settlement patterns, building materials, construction techniques, and socio-economic make-up. The residences also represent the state's largest collection of nineteenth and early twentieth century frame houses. They contribute to our understanding of a significant aspect of Park City's economic growth and architectural development as a mining community.2

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):
