4 ARCHITECTURAL DESCRIPTION & INTEGRITY

Building Type and/or Style: Other (modified to L) / Vernacular style  No. Stories: 1 ½
Additions: ☐ none  ☐ minor  ☑ major (describe below)  Alterations: ☐ none  ☑ minor  ☐ major (describe below)
Number of associated outbuildings and/or structures: ☑ accessory building(s), # _1__; ☑ structure(s), # _1__.
General Condition of Exterior Materials:
☑ Good (Well maintained with no serious problems apparent.)

Researcher/Organization: Preservation Solutions/Park City Municipal Corporation  Date: 06-2009
Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.):

Site: Rural setting with natural vegetation. House sits off of Snow's Lane with primary façade facing north.

Foundation: Concrete

Walls: Vertical siding - board and batten, wooden window and door trim.

Roof: Side gable roof form with dormers, full-width shed roof extension on front elevation - all sheathed in standing seam metal roof materials.

Windows/Doors: Various types including one-over-one double-hung sash, six-over-one double hung sash, fixed casement, "picture" windows of fixed casement, "French doors" with single lights, and doors with single lights.

Essential Historical Form: ☑ Retains  ☐ Does Not Retain, due to:

Location: ☑ Original Location  ☐ Moved (date _________) Original Location:

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates—known or estimated—when alterations were made): The central section of the house is 1-½ stories tall and side-gabled with gabled wall dormers, each with a double-hung window. A shed-roofed single-story addition on the front, possibly an enclosed front porch, stretches the full thirty-six foot length of the façade with large picture windows in horizontal openings. Knee brackets support the small gabled porch sheltering the front door. The unpainted wooden porch deck in front has three stairs and an unusual open metal pipe and wire grid railing.

A fifteen-foot-wide, one-and-a-half story ell extends back twenty-two and a half feet from the main section. It was most likely built at the same time as the side-gabled central section. It also has gabled wall dormers on both the east and west sides and a double-hung window in the second floor gable end. On the first floor it is surrounded by a single story addition that broadens in the rear (south elevation) to forty feet in width with a low-pitched gable roof and is glazed on the first floor gable end. Double glass doors lead onto a wooden deck that extends twelve feet south from the house and wraps around the house on the southeast side.

The corbelled brick wall chimney is the major feature on the east elevation. A single story shed-roofed addition, possibly at one time a glazed porch, extends back from the original section, with a single door and three double-hung windows. Double glass doors are located in the newest section toward the rear. The extent of changes has significantly diminished the building's historic integrity.

Setting (The physical environment—natural or manmade—of a historic site. Describe the setting and how it has changed over time.): The setting is semi-rural with agricultural fields and the large Armstrong barn to the north across the street. The house is at the end of the unpaved Snow's Lane and has a rural feeling in spite of the residential development nearby on Three Kings Drive.

There are two outbuildings on the property near the house. A wooden breezeway with a corrugated metal roof connects the house to the three-car gable-roofed garage on the east. The breezeway and the garage date from the late 1960s or early 1970s.¹ A curved concrete sidewalk leads around to the studio at the back (south). The corrugated metal round studio has a conical-shaped roof clad with metal standing seam roofing. It has windows on both levels and was built between 1994 and 2001.²

---

¹ From the time of the ownership by the Princes, according to the next owner, Raye Carleson Ringholz.
² Kirsten Whetstone, Park City senior planner, 12/1/06.
With the exception of additional accessory structures, the setting does not appear to have been altered significantly.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements.): Much of the physical material from the historic period has been replaced with new materials that are compatible with the types of materials used during the historic period. The new additions, particularly on the rear, also reflect the materials typical of that period.

Feeling (Describe the property's historic character.): The physical elements of the site combine to give a vague sense of life in a mining town of the late nineteenth and early twentieth centuries. The site has been significantly modified, but the mass and scale of the main building and the care taken to attach the accessory structures in a way that sets them apart from the main building has enabled the site to retain much of its historic character.

Association (Describe the link between the important historic era or person and the property.): This property is associated primarily with the agricultural activities that occurred on the outskirts of Park City during the mining era. In addition, the site is also associated with Herbert A. Snow. Herbert Snow was a banker in Salt Lake City who, among his many achievements in the area of ranching and business, narrowly lost the 1939 SLC mayoral race against the city's world-famous racecar driver, Ab Jenkins.³

5 SIGNIFICANCE

Architect: ☐ Not Known  ☐ Known: (source: )  Date of Construction: c. 1904-05
Builder: ☐ Not Known  ☐ Known: (source: )

The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1. Historic Era:
   ☐ Settlement & Mining Boom Era (1868-1893)
   ☑ Mature Mining Era (1894-1930)
   ☐ Mining Decline & Emergence of Recreation Industry (1931-1962)

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation): The site is associated with Herbert Ashby Snow, a prominent banker in SLC and rancher who raised prized Guernsey cows.

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):

Researcher/Organization: Beatrice Lufkin-Dina Blaes / Park City Municipal Corporation Date: 2006
Building Style/Type: Classical: Other - Vernacular / Other Residential Type No. Stories: 1 ½

Foundation Material: concrete, coursed rubble Wall Material(s): painted wooden shingle siding

Additions: none minor major (describe below) Alterations: none minor major (describe below)

Briefly describe the principal building, additions or alterations and their dates, and associated outbuildings and structures. Use continuation sheets as necessary.

The house faces Snow’s Lane to the north with its façade shaded by several large pine trees in the front yard. The central section of the house is 1 ½ stories tall and side-gabled with gabled wall dormers, each with a double-hung window. A shed-roofed single-story addition on the front, possibly an enclosed front porch, stretches the full thirty-six foot length of the façade with large picture windows in horizontal openings. Decorative shutters surround the two first-floor windows and the entry door. Knee brackets support the small gabled porch sheltering the front door. The unpainted wooden porch deck in front has three stairs and an unusual open metal pipe and wire grid railing.

A fifteen-foot-wide one-and-a-half story ell extends back twenty-two and a half feet from the main section. It was most likely built at the same time as the side-gabled central section. It also has gabled wall dormers on both the east and west sides and a double-hung window in the second floor gable end. On the first floor it is surrounded by a single story addition that broadens in the rear (south elevation) to forty feet in width with a low-pitched gable roof and is glazed on the first floor gable end. Double glass doors lead onto a wooden deck that extends twelve feet south from the house and wraps around the house on the southeast side.

The corbelled brick wall chimney is the major feature on the east elevation. A single story shed-roofed addition, possibly at one time a glazed porch, extends back from the original section, with a single door and three double-hung windows. Double glass doors are located in the newest section toward the rear.

Two small shed-roofed additions are found on the west side, one on the second floor where the ridge lines intersect and the other a single-story small room with a door on the north on the first floor. Both have aluminum slider windows. Other windows on the house are double-hung, one-over-one or six-over-one replacement windows.

There are two outbuildings on the property near the house. An unpainted wooden breezeway with a corrugated metal roof connects the house to the three-car gable-roofed garage on the east. The garage is clad in painted vertical wooden siding and has three single-car overhead doors on the façade. The breezeway and the garage date from the late 1960s or early 1970s. A curved concrete sidewalk leads around to the studio at the back (south). The corrugated metal round studio has a conical-shaped roof clad with metal standing seam roofing. It has windows on both levels and was built between 1994 and 2001.

The setting is semi-rural with agricultural fields and the large Armstrong barn to the north across the street. The house is at the end of the unpaved Snow’s Lane and has a rural feeling in spite of the residential development nearby on Three Kings Drive. The house is ineligible/noncontributing because of the first floor additions to the original structure, particularly on the façade.

1 From the time of the ownership by the Princes, according to the next owner, Raye Carleson Ringholz.
2 Kirsten Whetstone, Park City senior planner, 12/1/06.

Write a chronological history of the property, focusing primarily on the original or principal owners & significant events. Explain and justify any significant themes marked above. Use continuation sheets as necessary.

The spring running through the property is named after Elizabeth Sullivan, Sullivan’s Spring. Elizabeth Roseann Denton Sullivan was born in Ogden, Weber County, in 1857 to George and Margaret Jane Pears Denton. She and Patrick John Sullivan married and in 1880 were living in Stockton, Tooele County, while Patrick Sullivan worked in the smelter. Popular history states that she and her husband homesteaded the property. The mining industry drew the Sullivans to Park City where they were living in 1884 as their second son, John Denton Sullivan, was born. Patrick and Elizabeth Sullivan moved here from their smaller house to the south. Patrick died in 1898 in Park City and Elizabeth was left to raise their four sons alone.

Snow’s Lane was named after Herbert Snow, a Salt Lake banker who purchased the property in 1934. He ran the Snow Summit Ranch and raised Guernsey cows in a dairy operation, as well as pursuing a career in banking and living in Salt Lake City. This house was associated with the ranch. Herbert Ashby Snow was born in St. George in 1889 and married his second wife, Eleanor Taylor, in 1944. Following his death in 1957, his widow, Eleanor Taylor Snow, deeded the property to the Snow Summit Ranch Corporation in 1964.

Frederick S. Prince, Jr. and his wife, Anne Armstrong, received title to the property from the Snow Summit Ranch in 1970 and renovated the house to live in with their family. Anne Armstrong’s two brothers, Mel and Herbert, now live nearby; Mel in the c. 1926 Armstrong Barn and Herbert in the c. 1907 Judge Mine Superintendent’s House that was moved to Snows Lane. As children the Armstrongs had spent weekends on the property with their grandparents, the Herbert Snows. A family photograph shows Anne Armstrong as a child planting the pine tree in front of the house.

The Princes sold in 1975 to Joseph F. Ringholz and his wife, Raye Carleson, the Park City historian. The 205 Snows Lane address was used in the imprint on her Park City history, Diggings and Doings in Park City, in 1983. Henry J. (Hank) Louis purchased the property in 1994. He was an architect and built the round studio before he sold to Richard Tavener in 2001. The current owners, Patrick M. and Gwen S. Reddish, acquired the property in 2004.

3 Date is from Gerry Hanley, grandson of the Sullivans. The Summit County Assessor’s Office has 1922 as the construction date.
4 Telephone conversation with Mel Armstrong.
5 According to Gerry Hanley his grandparents the Sullivans used to live in the small frame hall-parlor at what is now 1895 Three Kings Drive, which has since been relocated on the lot and has a modern addition under construction in 2006.
6 Conversation with Mel Armstrong, 11/19/06.
