4 ARCHITECTURAL DESCRIPTION & INTEGRITY

Building Type and/or Style: 1-part block, false front No. Stories: 1
Additions: ☑ none ☐ minor ☐ major (describe below) Alterations: ☐ none ☐ minor ☑ major (describe below)
Number of associated outbuildings and/or structures: ☑ accessory building(s), # _____ ☐ structure(s), # _____
General Condition of Exterior Materials:

Researcher/Organization: Preservation Solutions/Park City Municipal Corporation Date: 12-2008
Good (Well maintained with no serious problems apparent.)

Fair (Some problems are apparent. Describe the problems.)

Poor (Major problems are apparent and constitute an imminent threat. Describe the problems.)

Uninhabitable/Ruin

Materials (The physical elements that were combined or deposited during a particular period of time in a particular pattern or configuration. Describe the materials.)

Site: Mid-block commercial building set at street front.

Foundation: Concrete.

Walls: Drop siding.

Roof: Gable roof form sheathed in what appears to be metal material.

Windows/Doors: Paired double-hung sash type.

Essential Historical Form: ☐ Retains  ☐ Does Not Retain, due to:

Location: ☐ Original Location  ☐ Moved (date __________) Original Location:

Design (The combination of physical elements that create the form, plan, space, structure, and style. Describe additions and/or alterations from the original design, including dates—known or estimated—when alterations were made): The one-story frame one-part block structure has been changed as a result of the construction of the Main Street Mall. The 1907 Sanborn Insurance map shows a small commercial building facing 4th street between Main Street and Park Avenue. It appears that either a very small section of the rear portion of the structure was truncated to accommodate the construction of the mall or the entire building was reconstructed after the completion of the mall; the latter is more likely. Also, the exterior siding does not appear to be original material. The window and door configuration on the main façade, however, remain as seen in a tax photo taken of the adjacent building at 364 Park Avenue.

Setting (The physical environment—natural or manmade—of a historic site. Describe the setting and how it has changed over time): The setting is not substantially different from what is seen in both early photographs and on the 1907 Sanborn Insurance map. The most significant alteration is the addition of the Main Street Mall to the rear of the structure.

Workmanship (The physical evidence of the crafts of a particular culture or people during a given period in history. Describe the distinctive elements): The physical evidence from the period that defines this as a typical Park City mining era commercial building cannot be verified; however, the distinctive elements such as the false front and the paired double-hung windows are typical of the era.

Feeling (Describe the property's historic character): Though the exterior materials appear newer, the physical elements of the site, in combination, convey a sense of life in a western mining town of the late nineteenth and early twentieth centuries.

Association (Describe the link between the important historic era or person and the property): The one-part block is one of the most common commercial building types constructed in Park City during the mining era.

Because this building is assumed to be a reconstruction of an earlier structure, it is not eligible for listing in the National Register of Historic Places. It does, however, convey important information about how the commercial area of Main Street developed and the reconstruction was executed in such a way as to retain its essential historical form.

5 SIGNIFICANCE

Architect: ☐ Not Known  ☐ Known: (source: )  Date of Construction: c. 1901

1 Summit County Recorder.
The site must represent an important part of the history or architecture of the community. A site need only be significant under one of the three areas listed below:

1. Historic Era:
   - Settlement & Mining Boom Era (1868-1893)
   - Mature Mining Era (1894-1930)
   - Decline & Emergence of Recreation Industry (1931-1962)

   Park City was the center of one of the top three metal mining districts in the state during Utah's mining boom period of the late nineteenth and early twentieth centuries, and it is one of only two major metal mining communities that have survived to the present. Park City's commercial buildings represent the best remaining metal mining town business district in the state. The buildings along Main Street, in particular, provide important documentation of the commercial character of mining towns of that period, including the range of building materials, building types, and architectural styles. They contribute to our understanding of a significant aspect of Park City's economic growth and architectural development as a mining business district.

2. Persons (Describe how the site is associated with the lives of persons who were of historic importance to the community or those who were significant in the history of the state, region, or nation):

3. Architecture (Describe how the site exemplifies noteworthy methods of construction, materials or craftsmanship used during the historic period or is the work of a master craftsman or notable architect):
